## Buy Windows software or devices

### How to purchase Windows for your business

Microsoft offers several ways to purchase software and devices for your business

How to purchase multiple software licences  
If you need multiple software licences contact a partner.

How to purchase multiple devices  
If you are looking to buy several devices, you can find a partner or work directly with the Microsoft Store Sales team.

- 
- 1 – Limited to Continuum-capable phones. External monitor must support HDMI input. App experience varies. Feature may require Continuum-compatible accessories, all sold separately.
  - 2 – Cortana available in selected markets; experience may vary by region and device. Cortana is disabled in the Education edition.
  - 3 – Touch capable tablet or PC required.
  - 4 – Hardware dependent; pen accessory may be sold separately.
  - 5 – Not all MDM capabilities are available in the Home SKU. MDM requires an MDM product such as Microsoft Intune or other third-party solutions (sold separately).
  - 6 – Separate subscription for Azure Active Directory required.
  - 7 – Available in selected markets. Functionality and apps may vary by market and device.
  - 8 – Requires either App-V Server (available at no additional cost as part of [Windows 10 Assessment and Deployment Kit](#)) or System Center Configuration Manager (sold separately).
  - 9 – To use Windows Hello with biometrics specialised hardware, including fingerprint reader, illuminated IR sensor or other biometric sensors is required. Hardware-based protection of the Windows Hello credential/keys requires TPM 1.2 or greater; if no TPM exists or is configured, credentials/keys protection will be software-based.
  - 10 – Companion devices must be paired with Windows 10 PCs via Bluetooth. To use a Windows Hello companion device that enables the user to roam with their Windows Hello credentials requires Pro or Enterprise 13- edition on the Windows 10 PC being signed into.
  - 11 – Windows Information Protection, formerly Enterprise Data Protection (EDP), requires either Mobile Device Management (MDM) or System Center Configuration Manager to manage settings. Active Directory makes management easier, but is not required.
  - 12 – Requires InstantGo or device that passes the device encryption HCK test.
  - 13 – Requires TPM 1.2 or greater for TPM-based key protection.
  - 14 – Requires UEFI 2.3.1 or greater with Trusted Boot; Virtualisation Extensions such as Intel VT-x, AMD-V, and SLAT must be enabled; x64 version of Windows; IOMMU, such as Intel VT-d, AMD-Vi; BIOS Lockdown; TPM 2.0 recommended for device health attestation (will use software if TPM 2.0 not present)
  - 15 – Windows Device Health Attestation Service can be used for conditional access scenarios which may be enabled by Mobile Device Management solutions (e.g.: Microsoft Intune) and other types of management systems (e.g.: SCCM).
  - 16 – Separate subscription for Azure Active Directory required.
  - 17 – Limited to Continuum-capable phones. External monitor must support HDMI input. App experience varies. Feature may require Continuum-compatible accessories, all sold separately.
  - 18 – Microsoft has received [Common Criteria certification for Windows 10](#) Mobile running on Lumia 950, 950 XL, 550, 635, giving customers assurance that security controls and cryptographic functionality is implemented properly.
