- Windows Hello for Business with biometric authentication requires specialized hardware, such as a fingerprint reader, illuminated IR sensor, or other biometric sensors, depending on the authentication method.
- Requires TPM 1.2 or greater for TPM-based key protection.
- Windows Information Protection requires either MDM or System Center Configuration Manager to manage settings. Sold separately.
- This is the right to purchase not the capability itself
- Not all MDM capabilities are available in the Home SKU. MDM requires an MDM product such as Microsoft Intune or other third-party solutions, sold separately.
- Requires Azure AD for automatic MDM enrollment. Requires Microsoft Intune for Blocking Status page. Sold separately.
- Requires Microsoft Intune or third-party MDM service. Sold separately.
- Available in select markets. Functionality and apps may vary by region and device
- non-volatile memory modules (NVDIMM) required
- Requires Azure AD and Microsoft Intune, sold separately.
- Requires Azure AD for identity management. Sold separately.
- Requires either App-V Server (available at no additional cost as part of Windows 10 Assessment and Deployment Kit) or System Center Configuration Manager (sold separately).
- Requires Bing for business to search across company resources and portals. Requires Office 365 subscription, sold separately, to search across OneDrive for Business and SharePoint locations.
- Shows up to 30 days of past activities done on table and mobile phone when users are signed into their Microsoft accounts.
- Available in select markets; experience may vary by region and device.
- Touch capable device required. Pen accessory sold separately.
- Remix 3D catalog available in select markets. Experience may vary by region and device.
